

**THE UNIVERSITY OF BRITISH COLUMBIA**  
**Department of Cellular and Physiological Sciences**  
**Graduate Teaching Assistants**

Teaching Assistants are required for the 2017 Winter Session in the following courses:

**CAPS 200**

2 positions

Duties include: Holding office hours, marking problem sets, assisting in deconstruction of research seminars, leading a guided tour of the research laboratory.

**CAPS 390 and 391**

3 positions per term. Duties include holding office hours, writing exam questions, assisting with the WebCt sites, invigilation and marking.

Candidates should have attained a first-class standing in a Biology, Histology, Gross Anatomy or Neuroanatomy graduate course and must be a registered Graduate Student.

**CAPS 303 and 430**

CAPS 303 – 3<sup>rd</sup> Year Human Physiology Laboratory for Honours Students.

CAPS 430 – Advanced Laboratory for 4<sup>th</sup> Year Honours Students.

Positions for both courses above are for 2 terms. Appointment percentage is based on the number of hours required per lab. Duties include hands-on assistance with experiments, marking lab reports, and invigilation. Normally a total of 5 TAs are hired for undergraduate labs for a 8-month period (September to April). Experience with animal care and any form of anesthetized rodent surgery is preferred for two positions. Experience with electrophysiology is preferred for one position. Experience in molecular biology, cell biology or genetics is preferred for two positions.

**Medical/Dental Undergraduate Anatomy Laboratories**

**Gross Anatomy** Terms 1 and 2

**Histology** Terms 1 and 2

**Neuroanatomy (Brain and Behaviour)** - Term 2

Duties include assisting with teaching in the Histology, Gross Anatomy, Neuroanatomy and Dentistry Laboratories – plus assistance with laboratory setup and examinations. These positions are monthly and % time is prorated according to the hours worked.

Candidates should have attained a first-class standing in a Medical, Graduate or Rehabilitation Histology, Gross Anatomy or Neuroanatomy course and must be a registered Graduate Student.

Hours are dependent on the number of laboratory hours in the Medical and Dental curriculum.
