The Department of Cellular and Physiological Sciences at the University of British Columbia, Okanagan campus, invites applications for a part-time Sessional Lecturer to teach the following within the Medical Under Graduate Program (MDUP) at the Southern Medical Program (SMP):

Laboratory components of MEDD 411, 412, 421, 422

**COURSE DESCRIPTION**

**Date/Time:** 2022/2023, Terms 1 & 2  
**Lecture:** 0-2 hours per week  
**Laboratory:** 2-4 hours per week  
**Required Texts and Other Materials:** All materials will be provided online  
**Salary:** Based on sessional lecturer’s salary scale as per the UBCFA Collective Agreement

**RESPONSIBILITIES**

Reporting to the SMP Site Lead, MEDD 411, 412, 421 and 422, the incumbent will be responsible for delivering teaching, exam set up and invigilation of labs (neuroanatomy, histology, gross anatomy) within the Medical Under Graduate Program (MDUP) at the SMP. They will be one of the primary instructors and main point of student contact for anatomy and histology components of MEDD 411, 412, 421 and 422 at the SMP. Additionally, the incumbent will co-teach sessions along with full-time faculty members within the SMP and MDUP. In this capacity, the incumbent will ensure the students follow the process described in the course materials and have the appropriate resources to conduct their studies.

**QUALIFICATIONS**

The successful applicants will have a Ph.D degree or be a PhD candidate and have relevant expertise in teaching medical undergraduate students. The successful candidate will be expected to have exceptional communication skills and a record that provides evidence of teaching effectiveness.

**APPLICATION PROCEDURE**

Applicants should include with the letter of application:

- A CV, which includes a record of experience and a detailed list of all post-secondary courses taught (course name and number, length, credit value, dates, and teaching responsibilities);
- Evidence of teaching effectiveness, if available; and
- Contact information for two referees

Applications should be directed to:

Dr. Sarah McCorquodale  
Regional Associate Dean, Interior  
UBC Faculty of Medicine, Southern Medical Program  
2nd Floor, Clinical Academic Campus  
2312 Pandosy Street
Applications will be accepted until August 25, 2022, or until position is filled.

All positions are subject to availabilities of funds and will be governed by UBC's "Agreement on Conditions of Appointment for Sessional Faculty Members".

ABOUT THE DEPARTMENT OF CELLULAR AND PHYSIOLOGICAL SCIENCES
The Department of Cellular & Physiological Sciences does world-class research aimed at understanding the fundamental workings of cells and organisms in an effort to identify the underlying causes of human diseases. The Department’s research is diverse, with Investigators working in a wide range of the leading invertebrate and vertebrate model systems and using biochemical, molecular genetic, cellular and physiological approaches. The Department has particular strengths in neuroscience, endocrinology, development and cancer. The robust collaborative spirit between the Department’s Investigators drives increasingly multidisciplinary research programs in each laboratory. This includes the incorporation of the latest technologies in molecular biology, genetics, next-generation genomics, proteomics, bioinformatics, and genetically-engineered animal models to complement our expertise in cell biological and physiology. Faculty members in the Department of Cellular & Physiological Sciences (www.cps.med.ubc.ca) are internationally recognized for their strength in neuroscience and in investigating the molecular and cellular processes underlying complex biological systems and human disease. Strong ties to the Djavad Mowafaghian Centre for Brain Health (www.centreforbrainhealth.ca) and ICORD ensure that the successful applicant will have a rich, collaborative, environment for their research program, offering bench to bedside opportunities.

ABOUT THE SOUTHERN MEDICAL PROGRAM
The Southern Medical Program (SMP) is one of four distributed undergraduate medical education sites within the University of British Columbia’s Faculty of Medicine delivered in partnership with the University of British Columbia (UBC), the University of Northern British Columbia (UNBC) and the University of Victoria (UVic) and in close collaboration with the Interior Health Authority (IH). The SMP delivers its education and training at five primary education sites at UBC Okanagan, Kelowna General Hospital, Vernon Jubilee Hospital, Royal Inland Hospital, and Kootenay Boundary Regional Hospital in addition to regional and community hospitals, community health centres, and family physician offices in 30 different communities. Within the IH region, there are over 1,500 health professionals engaged with teaching UBC medical students and residents.

The University of British Columbia is a global centre for research and teaching, consistently ranked among the top 20 public universities in the world. Since 1915, UBC’s entrepreneurial spirit has embraced innovation and challenged the status quo. UBC encourages its students, staff and faculty to challenge convention, lead discovery and explore new ways of learning. At UBC, bold thinking is given a place to develop into ideas that can change the world.

Our Vision: To Transform Health for Everyone.

Ranked among the world’s top medical schools with the fifth-largest MD enrollment in North America, the UBC Faculty of Medicine is a leader in both the science and the practice of medicine. Across British Columbia, more than 12,000 faculty and staff are training the next generation of doctors and health care professionals, making remarkable discoveries, and helping to create the pathways to better health for our communities at home and around the world.
The Faculty Of Medicine is comprised of approximately 2,200 administrative support, technical/research and management and professional staff, as well approximately 650 full-time academic and over 10,000 clinical faculty members - is composed of 19 academic basic science and/or clinical departments, three schools, and 24 research centres and institutes. Together with its University and Health Authority partners, the Faculty delivers innovative programs and conducts research in the areas of health and life sciences. Faculty, staff and trainees are located at university campuses, clinical academic campuses in hospital settings and other regionally based centres across the province.

*Equity and diversity are essential to academic excellence. An open and diverse community fosters the inclusion of voices that have been underrepresented or discouraged. We encourage applications from members of groups that have been marginalized on any grounds enumerated under the B.C. Human Rights Code, including sex, sexual orientation, gender identity or expression, racialization, disability, political belief, religion, marital or family status, age, and/or status as a First Nation, Metis, Inuit, or Indigenous person. All qualified candidates are encouraged to apply; however Canadians and permanent residents of Canada will be given priority.*
